- Contributed to the development and optimization of the Cowrywise web platform, enhancing user experience and accessibility.
- Gained hands-on experience in working with APIs, state management, and financial technology solutions.
- Participated in code reviews, debugging, and troubleshooting to ensure high-quality, scalable applications.

Projects

De-virtuoso here 🔗
A comprehensive business solution integrating, FinTech and EduTech to provide a custom solutions to Tertiary and secondary institutions.
The project has multiple dashboards for admin, business owners, schools and students with some extra cool features.

Mansior 🔗
A responsive landing page for a propTech startup

DynaBank 🔗
An Imaginary responsive mobile banking solution that allowed users to track and monitor their savings, cards and transactions all in one place.

Meenah Fashion store 🔗

This is a responsive digital storefront on the internet for the lovers of shoes and footwear in general. It facilitates the transaction between buyers and the seller. It showcase products, customers make selections and make payment using the paystack payment system.

I build this project with ReactJs, TailwindCSS, Redux, Firebase and Paystack pk.

Admin Dashboard 🔗

A professional and responsive admin-dashboard, showcasing users(customers) revenue and purchases, built with reactJS and TailwindCSS .

E-commerce product page 🔗

This is a solution to the E-commerce product page challenge on Frontend Mentor.
- View the optimal layout for the site depending on their device's screen size
- See hover states for all interactive elements on the page
- Switch the large product image by clicking on the small thumbnail images
- Add items to the cart
- View the cart and remove items from it

Easybank 🔗

This is a solution to the Easybank responsive landing page challenge on Frontend Mentor.
- View the optimal layout for the site depending on their device's screen size.
- See hover states for all interactive elements on the page.

Amazon clone

The aim of this project is to challenge my creativity and familiarity with different development tools.

Tindog 🔗

It's a simple web page for dogs. It is a Startup landing page for a fictional application named TinDog. I build this project using HTML, CSS and Bootstrap.

QR Code 🔗

This is a simple React application challenge project by Frontend Mentor, this project display a QR code, heading and text description. When there's no particular rules on framework or library to be used, i make use of React js and tailwindcss to build the component and styling respectively.
